***Election/Restriction***

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1-19, drawn to the products such as a cover with an applicator, classified in Class 206, subclass 305 and others.

II. Claim 20, drawn to a method for covering a hand-held electronic device, classified in Class 53, subclass unknown.

The inventions are distinct, each from the other because of the following reasons:

Inventions [II] and [I] are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (M.P.E.P. § 806.05(f)). In the instant the product as claimed can be made by another and materially different process such as by providing the tubular applicator having a first opening secured to the sleeve opening and a second opening.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because by their different classification and because they are capable of separate manufacture, use and sale, restriction for examination purposes as indicated is proper.
